EDUCATION

Virginia Polytechnic Institute and State University (Virginia Tech)

B.S. Major: Applied Economics

Minor: Computer Science

Blacksburg, VA

August 2016 – May 2020

Commodity Investing by Students (COINS)

Energy Analyst

Blacksburg, VA

November 2018 – May 2020

- Invested up to \$1MM on behalf of the Virginia Tech Foundation student-managed commodity investing club, trading in futures-based ETFs, ETNs, and covered call options
- Built and automated financial models in Excel, compiled and analyzed economic data sets using Python scripts, algorithmic web scrapers and regularly presented research and pitched trade ideas

EXPERIENCE

Mr Brainwash Art Museum

Full Stack Developer

Beverly Hills, CA

July 2022 - Present

- Developed and deployed a ticketing software to register attendees, automatically send QR tickets via email, and utilized MLkit to scan and verify tickets at the door of the museum
- Fully developed a photoshop app competitor to help artists manipulate layers of art and accelerate their creative process
- Programmed an iOS app for the museum gift shop to view and purchase hundreds of artistic prints updated regularly

INIQUIN Marketing

Founder/CEO

San Francisco, CA

December 2020 – May 2022

- Designed, built, and scaled custom websites using Flutter, Wordpress, AWS, and Shopify, for 27 small businesses using Pay-Per-Click advertising, influencer marketing, SEO, and display ads grossing over \$1 Million in sales for our clients
- Managed a digital marketing team of 8 people, conducting weekly meetings and written reports to track internal progress

Kaspian IT Consulting

Website Developer & Project Manager

Blacksburg, VA

December 2018 – May 2020

- Managed a team of outsourced developers and successfully sold a real estate analysis web application that web-scraped real estate data to model intrinsic values of properties using hedonic regressions. Pricing properties on characteristics like number of bedrooms & bathrooms, acreage, square footage, and the distance to schools and police stations

Forte Capital Group

Fintech Intern

New York, NY

May 2019 – August 2019

- Programmed web-scraping algorithms using Python to source high-net-worth leads for stockbrokers based upon property appraisal data, tax records, and reverse searched phone numbers, driving down client acquisition costs by 50%

Nicholas and Lence Communications

PR Intern

New York, NY

December 2017–January 2018; May 2018–August 2018

- Procured and vetted media lists, reinforced strong professional communication skills, modeled large data sets in Excel, and executed several phases of the company's PR strategy, individual to each client
