I start the work, build the system, and stay until it is in production. Companies, marketplaces, museum ticketing, Shopify and WordPress storefronts, and the machines they run on.

EDUCATION

Virginia Polytechnic Institute and State University (Virginia Tech)

B.S. Computer Science, Minor in Economics

Sigma Chi. Graduate of the Horizons Huntsman Leadership Summit.

Google Cloud Professional Cloud Architect, 2024.

Blacksburg, VA

August 2016 – May 2020

EXPERIENCE

[Companion Intelligence](#)

Co-founder

Los Angeles, CA

June 2025 – Present

- Started the company and grew it past \$2M. The ecosystem is an operating system, a digital-memory platform, an agent harness, and the Hub.
- The Hub is the private server and local app runtime. From anywhere, its store downloads apps and runs them on your own machine: Docker Compose, a React frontend, a Tauri desktop shell, and the backend beside them.
- Built the browser extension for Chrome, Firefox, and Safari that records history, bookmarks, downloads, and highlights and sends them only to that machine.
- Built ingestion and retrieval for email, calendar, photos, location, and browser data, and the real-time voice agent, on local hardware with GPU acceleration and fine-tuned models.

LITA Hotels

Systems Engineer

Calabasas, CA

December 2025 – Present

- Lived on-site for 90 days in a live hotel and shipped the robotics stack: four robot types from Pudu, Bear, and Gausium, plus the building's only elevator, on a multi-floor map.
- Reverse-engineered the ThyssenKrupp elevator's UDP protocol so a robot can call it, ride it, and get off without trapping a guest.
- Turned guest SMS into jobs. Wrote a common driver and a local HTTP service so navigation no longer waits on the vendor cloud.

[StudioTimes](#)

Founder

Los Angeles, CA

February 2024 – June 2025

- Founded the marketplace that books recording studios, then carried it through an exit. Studios in all 50 states. Marketplace payments in 150+ countries. Hundreds of studios and thousands of sessions.
- Built scheduling, payments, and transactional messages so the bookings ran themselves, and led CI/CD across the servers the acquirer needed in production.

[It's a Wonderful World](#)

Software Team Lead

Beverly Hills, CA

February 2023 – March 2024

- Led three engineers for Thierry Guetta on the Mr. Brainwash Museum. Issued 80,000+ tickets and drove \$2M+ in ticket revenue. Technical oversight of a system that moved more than \$20M.
- QR tickets by email, a door scanner with ML fraud checks, a gift-shop iPad that lifted on-site retail 40%, and Mr. Brainwash Paints, a custom iPad editor with his source art, brushes, stencils, and layers.

[Solwey Consulting](#)

Software Engineer, part-time remote

San Francisco, CA

December 2020 – May 2024

- Designed and delivered 30+ web, mobile, and internal tools: CRMs, dashboards, storefronts, and automations. Integrated Salesforce, Google Workspace, and vendor APIs.
- Built Shopify stores for [Transcend Collective](#), [Baked Cravings](#), [Roberi & Fraud](#), and [Xavvi](#). Several Xavvi stores together did \$10M+ a year. Headless migrations cut browse-to-buy time 30–50%.
- Engineered Liquid themes and metafield models, then headless storefronts on Hydrogen, Next.js, and React, with Storefront and Admin APIs, webhooks, checkout, CI/CD, and edge cache. Load times fell by up to 70%.
- Shipped GA4, first-party attribution, email automation, and event-driven merchandising. Connected Shopify metafields to external CMS platforms, including Sanity.

INIQUIN

Founder

San Francisco, CA

December 2020 – May 2022

- Founded the studio and shipped custom sites on WordPress, Shopify, Flutter, and AWS for 27 small businesses.
- Managed a team of 8. Pay-per-click, influencer, SEO, and display work grossed over \$1M in sales for clients.

JLI Strategies*Quantitative Developer, contract***South Lake Tahoe, CA***May 2020 – February 2022*

- Built automated long-short systems in Python and C++ and was responsible for a \$13M account, across equities, currencies, indices, commodities, and crypto.

Kaspian IT Consulting*Website Developer and Project Manager***Blacksburg, VA***December 2018 – May 2020*

- Managed outsourced developers and sold a real estate model that priced houses from beds, baths, acreage, square footage, and distance to schools.

Forte Capital Group*Fintech Intern***New York, NY***May 2019 – August 2019*

- Cut customer-acquisition cost 50% with Python scrapers over public appraisals and tax records, and built the targeting lists for brokers.

Commodity Investing by Students (COINS)*Energy Analyst***Blacksburg, VA***November 2018 – May 2020*

- Invested up to \$1MM for the Virginia Tech Foundation. Traded futures-based ETFs, ETNs, and covered calls, built the models in Excel and Python, and pitched the trades.

Nicholas & Lence Communications*PR Intern***New York, NY***December 2017 – August 2018*

- Built media lists, modeled the spreadsheets, and ran pieces of each client's PR plan.

SKILLS

- **Commerce and web:** Shopify Liquid, Hydrogen, Storefront and Admin APIs, WordPress, Next.js, React, GA4, SEO, headless CMS
- **Software:** TypeScript, JavaScript, Python, Go, C++, Swift, Dart, Node.js, REST, GraphQL, Flutter
- **Delivery:** AWS, GCP, Docker, CI/CD, Cloudflare, Vercel, multi-server deploys, Core Web Vitals
- **Systems:** on-device AI, RAG, local inference, robot drivers, real-time protocols, technical leadership
